📍 Pontianak City, West Kalimantan, Indonesia

Currently pursuing a Bachelor’s degree in Informatics at Universitas Sebelas Maret, expected to graduate in 2026. Alongside academic studies, certifications in CCNA and Linux scripting complement a strong foundation in networking, cloud computing, and programming. As a Frontend Developer at Merpati Solo Bakery, contributing to the development of an Admin Panel that enhances product management, order tracking, and customer engagement. Previous roles include developing a user-focused frontend application for an eco-friendly hotel reservation system using Next.js, TypeScript, and Tailwind CSS, showcasing expertise in responsive design and modern component architecture. Also served as a Teaching Assistant, facilitating hands-on learning in computer networking.

Experience

Frontend Developer | Merpati Solo Bakery - Surakarta, Central Java, Indonesia September 2025 - May 2026

- Developed a comprehensive digital management system and Admin Panel for Merpati Solo Bakery to streamline product management, order tracking, and customer engagement.
- Independently crafted user personas and high-fidelity interface designs manually from scratch using Figma, ensuring an intuitive and user-centric experience.
- Leveraged cutting-edge AI-native development workflows to rapidly prototype, optimize, and scale the frontend architecture using Next.js, React.js, and TypeScript.
- Drastically reduced development lifecycle duration while maintaining clean, robust code and a seamless user experience.

Teaching Assistant for Computer Networks Course | Universitas Sebelas Maret - Surakarta, Central Java, Indonesia March 2025 - June 2025

- Facilitated hands-on learning as a Computer Network Practicum Assistant using Cisco's ITN 7 curriculum.
- Prepared lab materials and guided students through networking protocols.
- Troubleshoot issues and collaborated with other assistants and lecturers to align labs with course objectives.
- Stayed updated on networking technologies and provided feedback to enhance student learning.

Cloud Computing Cohort | Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka September 2024 - December 2024

- Completed an intensive 4-month Cloud Computing program developing expertise in cloud infrastructure design, backend development, and system scalability.
- Developed the cloud infrastructure and server-side logic for "KulinerKita," a culinary recommendation mobile app tailored for Surakarta's tourism and MSME ecosystem.
- Utilized Google Cloud native services, including Cloud Run and App Engine, to deploy a modular, serverless application framework.
- Developed robust RESTful APIs with Node.js and Express to handle advanced frontend queries.
- Administered Cloud SQL (MySQL) databases and integrated deployed machine learning models for real-time personalized restaurant suggestions.
